PROFESSIONAL SUMMARY

Senior AI Professional with **3.6 years of experience** in building AI applications using Python and Generative AI technologies. Experienced in developing AI agents, LLM-based applications, RAG solutions, and multi-agent systems using LangChain and MCP. Skilled in building REST APIs, deploying applications on AWS using CI/CD pipelines, and working with Docker and GitHub. Passionate about creating scalable, reliable AI solutions that automate business processes and solve real-world problems.

KEY SKILLS

Programming: Python, SQL

Generative AI: LLMs, Prompt Engineering, RAG, AI Agents, Agentic AI

Frameworks: LangChain, LangGraph, CrewAI, FastAPI, Flask

AI Protocols: MCP (Model Context Protocol), AI Tool Integration

Cloud: AWS (EC2, S3, IAM, VPC, RDS, CloudWatch)

DevOps & Containers: Docker, Docker Hub, Git, GitHub, CI/CD

Databases: PostgreSQL, Supabase

Web Technologies: REST APIs, JSON

Development Tools: VS Code, PyCharm, Cursor, Jupyter Notebook, Postman

Concepts: Multi-Agent Systems, API Integration, Workflow Automation

WORK EXPERIENCE

AI Engineer

Datapro information technology | Feb 2022 - Dec 2025

- Developed AI-powered applications using **Python, LangChain, and Large Language Models (LLMs)** to automate business processes and improve productivity.
- Built and integrated **MCP (Model Context Protocol) servers** to enable AI agents to interact with external tools and services.
- Designed and implemented **Retrieval-Augmented Generation (RAG)** pipelines by integrating vector databases and external knowledge sources to improve the accuracy and relevance of AI responses.
- Created and managed **REST APIs** using **FastAPI** and Python to support scalable AI applications and third-party integrations.
- Developed multi-step AI workflows using **LangChain**, enabling AI agents to perform complex tasks efficiently.
- Deployed and maintained AI applications on **AWS** using services such as **EC2, S3, and Lambda**.
- Used **Docker, Git, and GitHub** to containerize applications, manage source code, and support CI/CD deployment workflows.
- Designed workflow automations using **n8n** to connect multiple systems and reduce manual effort.

- Improved application performance by optimizing backend services, API response times, and cloud resource utilization.
- Worked closely with cross-functional teams to understand business requirements and deliver reliable, production-ready AI solutions.
- Participated in code reviews, testing, debugging, and documentation to ensure software quality and maintainability.
- Contributed to the design of scalable and maintainable AI application architectures following software development best practices.

EDUCATION:

Bachelor of Technology (B.Tech) – Electrical and Electronics Engineering (EEE)

Godavari Institute of Engineering & Technology (GIET), Rajahmundry

Affiliated to JNTU Kakinada
